GREEN ENERGY PROJECT IN 13 CHURCH SCHOOLS

Date: Thursday, 12th December 2013

Venue: St Augustine's College, Pietà

Time: 9.15 a.m.

13 Church Schools have completed the Green Energy Schools project with the aim of reducing the schools' dependency and use of non-renewable energy sources. A total of 1,525 photovoltaic panels have been installed on the roofs of the participating schools, generating a total of 622 megawatt-hour of electricity annually. Intelligent lighting systems have also been installed in three schools.

The schools benefited from the European Development Fund (ERDF) under the Cohesion Policy Programme (2007 – 2013). More details will be announced during a Press Conference which will be held tomorrow, at St. Augustine's College, Pietà, at 9.15 a.m.
